RESPONSE AND ELECTION OF SPECIES

In response to the Office communication dated May 8, 2006, requiring election of a single species for examination, Applicant respectfully disagrees and submits that a *prima facie* case for why it would be burdensome to examine all the species together has not been made. However, in order to advance prosecution of the application, Applicant hereby elects without traverse the species of Figure 6. All of claims 1-27 recite at least one "actuator" at the proximal end and thus all the claims encompass the elected species.
